My current short term goal is to become an expert in the web technology and put innovative ideas into play. I have self-developed confidence to solve any kind of challenges I face and thus add well to the organization's productivity. I can develop full stack application but I also want to become an excellent system design architect and a Devops Engineer.

Work Experience

08/2015 – 03/2018   Bangalore, India
Senior Systems Engineer
Infosys Ltd.

Accomplishments
Worked as a team member for offshore costing application team of an American clothing and accessories retailer GAP which basically is a tool where client and their vendors work together for costing of the products. Worked with agile team as a Quality Analyst for bug fixing, adding new features, and improvements of the tool with Jira. Also worked in Service Now for maintenance and continuous feedback and was also involved in continuous monitoring. Also worked for automations for routine tasks such as server re-starts, report-generation for Business Analyst team etc. Had exposure to MongoDB and REST architecture in the microservices based applications.

10/2013 – 07/2015   Bangalore, India
Systems Engineer
Infosys Ltd.

Accomplishments
Worked in masking team to encrypt customer's sensitive data of a bank to protect data with Mainframe technology.

04/2013 – 09/2013   Bangalore, India
Systems Engineer Trainee
Infosys Ltd.

Accomplishments
Underwent generic training covering Core Java, DBMS and OS concepts. Cleared stream training in Core Java, JSP, JDBC and SQL Server.

Education
